IRON POT COUPLINGS

Cast iron threaded pot coupling for metering valve outlets

Cast Iron Quick Pot Couplings are exceptionally strong and durable, providing superior wear resistance and longevity

Cast Iron Quick Pot Couplings ensure secure and efficient connections between metering valve outlets and blast hoses. By ensuring airtight connections and safe installations, these couplings reduce turbulence and wear, enhancing the overall lifespan of your blasting system and boosting productivity.

■ FEATURES

- 2-claw threaded coupling designed for metering valve outlets
- The threaded design ensures a tight, leak-proof connection with proper thread sealant or tape application
- Regular inspection of gaskets and couplings ensures operational efficiency and safety

■ SIZES

Model	Part No.	Bore Size(B)	Length(L)	Entry Diameter(D)
CFT 3	CFT324	1 1/4"	58 mm	39 mm

Requirements for operation (required but not included with this equipment): Blast Hose; Blast Machine; Blast Hose Coupling; Pot coupling washer.
