RUBBER SHEETING

Abrasion-resistant lining for blast booths

Rubber sheeting is extensively used in Blastline blast booths to protect the interior surfaces from abrasive rebound and wear caused during blasting operations. These durable sheets are typically fixed along the walls and doors to absorb the impact of high-velocity abrasive particles, reducing damage to the booth structure and prolonging its lifespan. Additionally, rubber linings help minimize noise levels and prevent dust build-up on booth surfaces. Their easy-to-replace design ensures minimal downtime and maintains a safe, efficient blasting environment.

■ TECHNICAL SPECIFICATIONS

Polymer	Natural Rubber, EPDM, Nitrile, etc
Colour	Pink, Black, Beige
Surface	Single-sided or double-sided fabric design
Hardness (Shore-A)	55-75
Tensile Strength (MPa)	14-24
Elongation at Break (%)	450-550
Tear Strength (N/mm)	55-80
Abrasion loss (mm ³)	120-180
Maximum Temperature	-10°C
Minimum Temperature	+70°C
Specific gravity	1.3
Thickness	3 mm
Width	1000 mm, 1100 mm, 1200 mm
Length	Customizable as required
