

BLASTING EQUIPMENT

CONSERVE UNIT

Portable dry abrasive blasting unit for small jobs

The Blastline Conserve Unit is a portable dry abrasive blasting unit designed to efficiently remove rust, scale, coatings, and contaminants from metal, concrete, and other hard surfaces in small jobs. The Conserve Unit operates on compressed air and utilises a controlled abrasive flow to deliver consistent surface preparation for minor tasks. The system features an abrasive tank, ergonomic gun assembly, Screen, and a 10ft flexible material hose for extended reach.

APPLICATIONS

- Scale Removal
- Glass Etching

FEATURES

- Robust Construction and Portability
- Wide Grit Compatibility
- High-Flow Air Delivery
- Efficient Abrasive Handling
- Ergonomic Design
- Safety

TECHNICAL SPECIFICATIONS

Operating Pressure	0.5 – 0.62 MPa (5 – 6.2 bar / 70 – 90 psi)
Air Consumption	Approx. 30 – 40 CFM
Abrasive Tank Capacity	~18.9 kg (sand capacity)
Compatible Abrasive Grit Range	#30 – #180 mesh
Nozzle Diameter	8 mm (5/16")
Inlet Connection	Rc (PT) 3/8"
Hose Length	Approx. 10 ft
Hose Internal Diameter	1/2"
Overall Dimensions (Dia × H)	Ø280 × 700 mm
Net Weight	~5.5 kg

Requirement for operation: air supply, abrasive media, personal protection equipment.
