

BLASTING EQUIPMENT

POP UP VALVE ABOVE 50 LTR

Automatic pressure sealing pop-up valve

The blastline internal pop-up valve ensures fast pressurization of the blastline blast machines. It acts as an automatic seal to hold pressure during operation and allows abrasive media to enter when depressurized. It features durable rubber mushroom heads, which provide excellent sealing and extended service life.

■ FEATURES

- Automatic pressure scaling pop-up valve.
- Allows for fast pressurization of the blast pot.
- Durable reinforced rubber mushroom head.
- Stem approx 150 mm long and 21 mm external diameter.
- Very hard-wearing and long-lasting. Fits 50L & above blast machine.

■ PARTS LIST

Sl. No.	Part No	Description	Quantity
1	PV-0000001	Pop-up valve	1
2	PV-0000002	Plate	1
3	PV-0000003	Tube	1
4	PV-0000004	O ring	1
